## About the MBTI® Instrument

The MBTI tool is the most widely used personality instrument in the world, with over two million taking it annually.

It is a self-report personality questionnaire used to measure and describe people's preferences for how they like to get information, make decisions and orient their lives. It is based on Carl Jung's theory of perception and judgment and classifies people into 16 broad personality Types.

The MBTI instrument helps to improve teamwork and leadership effectiveness by improving understanding of self and others and reducing unproductive interpersonal and intra-organizational conflict.
